† Project type definitions:

- Non habitable projects are those that are not dwelling types. Examples can be furniture, bus shelters, signage etc.
- Residential properties < 4 levels are typically easy to maintain, given their height and access.
- Light commercial projects < 4 levels are sheltered from neighbouring buildings, but require greater durability due to higher usage and wear.
- High rise residential and commercial projects are less sheltered from neighbouring buildings, raising their exposure and reducing their ease of maintenance.
- Prestigious commercial projects attract attention and require high quality finishes to uphold the longevity and design requirements.
- Monumental projects attract the most attention and have the highest standards required to uphold the reputation and protection expected from landmark sites.

PROTEXTURE™

TEXTURED RANGE

Highly mar and scuff resistant textured finishes built to protect, delivered with warranty grade* advanced highly durable polyester thermosetting powder. Recommended usage includes exterior residential and light commercial buildings less than 4 levels. See product suitability tables for more information.

ALPHATEC®

BRIGHT RANGE

Fun, bright solid colours that produce a big impact, delivered with tough polyester thermosetting powder. Recommended usage includes exterior non-habitable projects. Alphatec is not supported by a Dulux warranty and where colour retention is paramount, we recommend the Duratec® Intensity® powder coat range. See product suitability tables for more information.
